

~ FOR IMMEDIATE RELEASE ~

Faroudja Toner has recently introduced a drum for the HP 9000, it was announced. "We carry toner and chips for this cartridge, but were missing the drum, so we are glad to offer it," explained company president Phil Faroudja. "We always want to be able to provide complete support for our customers." The Faroudja HP 9000 OPC drum, at a weight of 0.5 pounds, is geared and available individually or in large quantities. "The HP 9000 cartridge is different from the others, not only in toner composition but in other areas, so this drum has been specifically designed for this application." added Faroudja. This adds to Faroudja's drum selection, which not only includes other Hewlett-Packard engines, but also a wide range for Canon, Samsung, Minolta, Sharp, Xerox, and others. "We want to have any drum available that our customers may need."
